

Using data insights to protect
your customers and improve
their experiences?

**Now that's
a big idea.**

**Protect, optimize, and add value to each payment transaction.
*Because your customers deserve it.***

Today, people simply expect instant, invisible and frictionless payment experiences every time they buy something. But you're still responsible for keeping your business secure from an ever-growing number of payment threats. Decision Manager from CyberSource gives you the power to help do both.

With Decision Manager, you get all the tools and intelligence to build safety, convenience and efficiency into the fabric of every payment experience. You get a completely customized solution that's built to perfectly match and adapt to your unique priorities, no matter how much they change. It's a big idea that resolves the tension between making payments easy and keeping your business safe—by delivering the confidence and cured insights that come from our experienced managed risk analysts and a battle-tested decision engine.

Big expectations? No problem!

How quickly can you identify genuine transactions without compromising the customer experience? Intelligence from more than 68 billion transactions processed worldwide by Visa and CyberSource help to sniff out risky or bogus transactions, apply the industry's most advanced artificial intelligence to make better payment decisions based on your priorities, and gain the insights you need to understand your customers and get the most out of your business.

More good payments = more revenue

False positives weaken customer loyalty and hurt your business. But Decision Manager provides the deep expertise and transaction data-driven insights you need to accept more good payments and reject more fraudulent transactions. This finely tuned, fully customizable mix of tools and intelligence—powered by Visa's and CyberSource's leading global insights and security—delivers a rich, capable and carefully tailored business solution that no plug-and-play, one-size-fits-all fraud management tool can match. With Decision Manager, you can keep fraud low, customer satisfaction high and revenue flowing as your business grows and evolves.

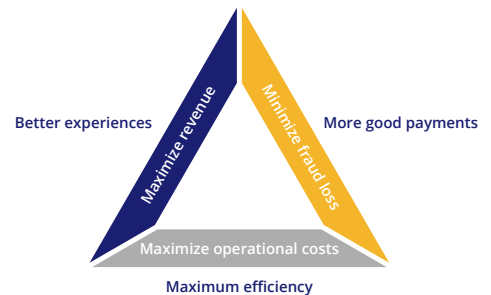

Go big with your brand (and your bottom line)

Are you ready to transform fraud management from a drag on your business into one of your strongest competitive advantages? Decision Manager can help protect your reputation, deliver great customer experiences and optimize your revenue with each transaction. Over 20 years of experience and insights give you access to a robust score-based solution to manage your transactions and maintain your reputation.

Better balance starts with bigger insights and expertise

Effective payment and fraud management is a never-ending juggling act between customer convenience, optimized payment acceptance and operational efficiency. Decision Manager provides the flexibility, precision, insights and expertise you need to find the perfect balance—combined with the confidence that comes from partnering with a trusted global leader with a proven track record of success.

Only experience and big data can get it done

Decision Manager is a Visa-owned fraud solution, fully integrated with all of its systems, data, and analytics. That means you can take advantage of:
